

LED APPLICATION: Interior and exterior new construction installation for petroleum station and C- Store

“We’ve been getting a lot of compliments on the new recessed canopy lights but none more than the competition. Everyone wants to know what BetaLED is doing.”

*Kevin Merritt, Director of Facilities, Midwest Division
Circle K*

LED PRODUCTS

20 – 90 LED exterior recessed canopy luminaires

16 – 120 LED exterior area luminaires

10 – 60 LED exterior wall mount security luminaires

22 – 80 LED interior round pendant mount luminaires

BENEFITS

- BetaLED significantly reduces energy use.
- Reduced luminaire maintenance provides cost-effective, long-life lighting solution.

LED Upgrade Gets Noticed

Five Columbus, Indiana-area Circle K petroleum and convenience stores are saving energy with BetaLED luminaires. Three canopy installations and two complete interior and exterior installations are saving significantly in the areas of energy consumption and lumen maintenance.

“We selected BetaLED for new construction and retrofit installations because of the energy savings and life expectancy that will equate into maintenance savings. We’re all about reducing energy use,” said Kevin Merritt, Director of Facilities, Midwest Division Circle K. “We’ve been getting a lot of compliments on the new recessed canopy lights but none more than the competition. Everyone wants to know what BetaLED is doing.”

The razed and rebuilt location at 1720 National Road is achieving excellent energy savings with the use of low wattage BetaLED fixtures. Customers are invited into the roadway and parking lot with safe, inviting light from 16 area luminaires. Twenty 164-watt 4 1/2-light bar recessed canopy luminaires illuminate Shell fuel pumps with clean white illumination and 10 wall mount security luminaires draw customers inside the Circle K convenience store. The store interior is illuminated with 22 silver pendant mount luminaires that enhance product displays and aisles.
